Squiz Platform Comprehensive Critical Fixes - COMPLETED

Successfully resolved ALL critical issues identified by the user and deployed a fully functional platform with comprehensive fixes.

Critical Issues Resolved:

1. Form Sharing Page CREATED

- **NEW:** Dedicated FormSharePage.tsx with complete sharing functionality
- **NEW:** Share buttons integrated into individual form pages
- **Features:** Social media sharing (WhatsApp, Facebook, Twitter), email sharing, one-click link copying
- **Route:** Added `/form/:id/share` route with full sharing interface

2. Settings Page Errors FIXED

- **Fixed:** Null/undefined access errors causing white screen crashes
- **Fixed:** Comprehensive error boundaries and safe state updates
- **Fixed:** Improved loading states and graceful error handling for all settings

3. Q&A Section Issues RESOLVED

- **Fixed:** Mobile layout - categories and time fields now fully responsive on all devices
- **Fixed:** Image upload functionality added to Q&A questions with file input system
- **Fixed:** Category dropdown layouts work properly on mobile (320px+ width)
- **Fixed:** Time field responsive design prevents layout breaks

4. Statistics Page COMPLETELY REBUILT

- **NEW:** Created UserStatsPage.tsx replacing admin panel for user stats
- **Features:** Personal quiz results, score distributions, performance analytics
- **Features:** Weekly activity tracking, time statistics, recent results history
- **Features:** Progress visualization with interactive charts and trends
- **Route:** Updated `/stats` to show user statistics instead of admin panel

5. Admin Panel Statistics CORRECTED

- **Fixed:** User count displays actual number of registered users (not hardcoded)
- **Fixed:** All statistics show real-time accurate data from database
- **Fixed:** Statistics calculations properly reflect current platform state

Technical Improvements:

- **Added:** Missing Tabs UI component for enhanced user interface
- **Fixed:** All build errors (duplicate functions, missing imports resolved)
- **Enhanced:** Mobile responsiveness across entire platform (320px+ support)
- **Improved:** Form pages with integrated share functionality
- **Fixed:** Import/export issues preventing production builds

Deployment Results:

- **Production URL:** <https://0xcntxq4czg8.space.minimax.io>
- **Build Status:**  Error-free production build completed
- **Platform Status:**  Fully functional across all devices and user roles
- **All Features:**  Working correctly with comprehensive testing

Mobile Optimization:

- **Q&A Section:** Fully responsive layout with proper category/time field handling
- **Forms:** Enhanced mobile interface with share functionality
- **Statistics:** Mobile-optimized charts and data visualization
- **Admin Panel:** Improved mobile layout for administrative functions

RESULT: The Squiz Platform now has ALL critical issues resolved, featuring complete form sharing capabilities, fixed mobile layouts, accurate statistics, and error-free functionality across all user roles and devices.

Key Files

- /workspace/squiz-platform/src/pages/FormSharePage.tsx: NEW - Dedicated form sharing page with social media, email, and link sharing functionality
